

Problema 1

```
import java.util.Scanner;

public class First {

    public static void main(String[] args) {

        Scanner sc=new Scanner(System.in);

        int n=sc.nextInt();

        int i=2;

        do {

            System.out.print(i+" ");

            i+=2;

        }while (i<=n);

        sc.close();

    }

}
```

Problema 2

```
import java.util.Scanner;

public class Second {

    public static void main(String[] args) {

        Scanner sc=new Scanner(System.in);

        int n=sc.nextInt();

        double i=1;

        int s=0;

        do {

            int p=(int) Math.pow(i, 2.0);

            s=s+p;

            i++;

        } while (i<=n);

        System.out.println( "s="+s);

        sc.close();

    }

}
```

Problema 3

```
public class Third {  
    public static void main(String[] args) {  
        int i=1;  
        do {  
            int j=1+i;  
            do {  
                System.out.printf( "%3d" ,i);  
                j++; } while (j<=i);  
            System.out.println();  
            i++;  
        }while (i<=5);  
    }  
}
```
